<sup>\*</sup> The listed frequencies are the WAM Run 3 results as calculated based on the most current version of the TCEQ WAM Run3, dated \_\_\_\_\_\_, available to the Stakeholder Committee with water rights authorized as of that date. The Stakeholder Committee recognizes that updates to the WAM to extend the hydrologic period of record or incorporate new model code or software for simulating those same water rights may occur and may result in the calculation of different WAM Run3 frequencies. The Committee acknowledges that applying new frequencies calculated based on those changes in lieu of the listed values would be appropriate in those limited circumstances.
